

Stylus Pro 11.6 Quick Usability Features

Stylus Pro 11.6 includes a number of quick usability features designed to improve your day-to-day experiences in the application.

For a complete list of new features, please review the Release Notes (available on the 11.6 Landing Page at markovprocesses.com)

Add a newly created portfolio directly to your current study

When creating a portfolio in the Portfolio Editor, a new 'Add to study' checkbox will populate the portfolio directly into your active report.

Excription:	Add to study
Memo	
	Cancel
	~
Editor Returns Simple Port	olio 🛛 Advanced Portfolio
Rebalance NONE erod used: NONE Select Assets Equal Weight	🗍 Copy 👻 🖺 Paste
Db ID Label Ticker Begins Ends Weights	II
Total	0.000000

Change the order of open studies

When multiple studies are open, you can use drag-and-drop or a right-click menu to change the order your open studies display in in your list/tabs.

🗋 • 🗁 • 🗋 • 😸 🕨 🌍 😂 🖶 • 🎼 📽 💿 🖾 • 🎼 🔹 📾 • 🎼 🔀

Additional default Manager Database preferences

Using our new 'Learn and remember' option, you can have the default database be whatever you used last in that module or node. Additionally, you can now choose a linked database as your default selection. Note that you can still set your default to be the first database from the configurator list, in line with the application's past standard.

Stylus Pro 11.6 Quick Usability Features

Type in a report page number or zoom level

New page controls allow you to jump directly to any report page. You can also type in your desired zoom percentage, as well as zooming in/out using a control.

Design Tree scrolling

Use your mouse wheel to scroll up or down the Design Tree without changing your selection.
